

Vážené kolegyne, vážení kolegovia,  
pozývame vás na vedeckú prednášku v rámci cyklu  
**“Jesenné stretnutia v Parku”**

**Dr. Martin Kolísek (BioMed Martin, JLF UK)**

**„Mechanizmy horčíkovej homeostázy v etiológii degeneratívnych a onkologických ochorení“ (Mechanisms of magnesium homeostasis in etiology of degenerative and oncological ailments)**

Dňa **13. 10. 2017 o 10:00**  
v Konferenčnej miestnosti VP UK  
Ilkovičova 8, Bratislava

**Dr. Martin Kolísek** je absolvent PriFUK (odbor Molekulárna biológia v r. 1999), dlhodobo pôsobiaci na viacerých zahraničných pracoviskách (Vienna Biocenter / Institut für Mikrobiologie und Genetik, AT; JABSOM at University of Hawai'i, USA; Freie Universität Berlin, DE) aktuálne pracovník v divízii neurovied v biomedicínskom centre (BioMed) Jesséniovej Lekárskej Fakulty UK v Martine, podporený programom vlády SR „Návrat domov“.

**Vybraná bibliografia prednášajúceho:**

Miersch C, Stange K, Hering S, **Kolísek M**, Viergutz T, Röntgen M. Molecular and functional heterogeneity of early postnatal porcine satellite cell populations is associated with bioenergetic profile. *Sci Rep*. 2017 Mar 27;7:45052.

Mastrototaro L, Smorodchenko A, Aschenbach JR, **Kolísek M**, Sponder G. Solute carrier 41A3 encodes for a mitochondrial Mg<sup>2+</sup> efflux system. *Sci Rep*. 2016 Jun 15;6:27999.

Sponder G, Mastrototaro L, Kurth K, Merolle L, Zhang Z, Abdulhanan N, Smorodchenko A, Wolf K, Fleig A, Penner R, Iotti S, Aschenbach JR, Vormann J, **Kolísek M**. Human CNNM2 is not a Mg<sup>2+</sup> transporter *per se*. *Pflugers Arch*. 2016 Jul;468(7):1223-40.

**Kolísek M**, Montezano AC, Sponder G, Anagnostopoulou A, Vormann J, Touyz RM, Aschenbach JR. PARK7/DJ-1 dysregulation by oxidative stress leads to magnesium deficiency: implications in degenerative and chronic diseases. *Clin Sci (Lond)*. 2015 Dec;129(12):1143-50

Schweigel-Röntgen M, **Kolísek M**. SLC41 transporters-molecular identification and functional role. *Curr Top Membr*. 2014;73:383-410.

Kolísek M, Sponder G, Mastrototaro L, Smorodchenko A, Launay P, Vormann J, Schweigel-Röntgen M. Substitution p.A350V in Na<sup>+</sup>/Mg<sup>2+</sup> exchanger SLC41A1, potentially associated with Parkinson's disease, is a gain-of-function mutation. *PLoS One*. 2013 Aug 15;8(8):e71096.

**Kolísek M**, Galaviz-Hernández C, Vázquez-Alaniz F, Sponder G, Javaid S, Kurth K, Nestler A, Rodríguez-Moran M, Verlohren S, Guerrero-Romero F, Aschenbach JR, Vormann J. SLC41A1 is the only magnesium responsive gene significantly overexpressed in placentas of preeclamptic women. *Hypertens Pregnancy*. 2013 Nov;32(4):378-89.

**Tešíme sa na stretnutie**

**za organizátorov,**

**Stano Stuchlík**
